## EXAMINE FINANCIAL CONCERN.

NEW JERSEY OFFICEALS SEERING IN BEVORE ITS CHARFER.

Bankers and Merchants' Sequesty Co. of Sex tark and Newsell Accused of Freeting Hanking and Prior Power er hat conferent by the charter.

Territor, N. J., Jane 18 Attorney-Contrai Metarter, at the instance of the Denear of Banking and Inmeanor, began grants precendings in the Supreme day to revoke the charter of the es and Merchante' Securities Comwhich has offices at 44 Broadway, tork, and in the Century Building, Remark The technical ground upon ench for application is based is that the someony has been exercising banking and powers not conferred by its charter, aring been formed under the general cation act of 1896 and not under the stecial acts governing banks and trust companies. The action of the Attorney-General followed an investigation of the company's affairs by the bank examiners and Post Office Inspector James T. Cor-

The Bankers company was incorporated in New Jersey last January, the incorporators being J. W. Brunton, 182 Neptune avenue, Jersey City; F.W. Mackey, 103 Summit street, Newark, and F. R. Dunn of Rutherford, N. J., and Denver, Col. Circular pamphiers stated that it was incorporated in New lersey with authority to carry on certain lines of business not included in the powers conferred by the general corporation act. When Examiner 1. R. Vredenburgh called at the Newark office he was informed by Brunton that he had severed his connection with the company and that most or all of its business was transacted at the New York office. The examiner then went to New York and met A.P. Grother, the supervising examiner" of the company, and Mr. Mackey, its president.

President Mackey suggested that the company might be voluntarily dissolved and reincorporated in another State, adding that it had done no business as transfer agent or trustee in lending or discounting and had issued no certificates and guaran-teed no stocks or bonds. The offer to voluntarily dissolve the charter was never made good, although under pressure from the Banking Department the secretary did write to the Secretary of State saying that the company "hereby surrenders its char-The officers, however, refused or failed to comply with the form required by lew for a valid dissolution.

Later Examiner Vredenburgh called upon Post Office Inspector Cortelyou and learned that he had been trying to make out a case against Grother for some time. A. B. Thompson, treasurer of the Provident Savings Life of 346 Broadway, who had temporarily acted as secretary and treasurer of the Bankers' Company said he had once prepared a list of the company's assets. which he had in his possession but could not surrender. It was then arranged that the post office inspector should compel the surrender of the list, whereupon Mr. Thomp-son made a statement which satisfied the officials that if there were any irregularities in the company he was not involved. Liter through him a Mr. Rodgers was induced to accept a position as vice-president of the company. This statement was confirmed by Mr. Bruce, who said that Mr. Rodgers, Mr. Thompson and himself all withdrew from the company on the same day.

from the company on the same day.

Mr. Bruce gave the examiner a list of the deeds and stocks which were understood to be the assets of the company purchased from Grother. The deeds were not accompanied by any evidence of title and there was nothing to show their value. Neither were they recorded at that time. The principal piece of real estate appeared to be a tract in West Virginia said to contain 75,000 acres, but its description was quite treatifier tory to the examiner. unsatisfactory to the examiner.

## COPPER, TIN AND LEAD.

reasing Export Demands for Copper by

Electrical Engineering Trades. Heavy tonnages were book ed in yesterday's shipments to an electrical corporation which has two plants along the Rhine. Another German corporation in the electrical field is negotiating for 18,000,600 pounds, over requirements for the last quarter

of the year. In speaking of the remarkable sperity of Germany's copper consuming interests, one of the most important copper producers in the West informed THE SUN that the largest consuming interest in American wire bars in Germany increased its 1905 busicess 62 per cent. over the previous year, and its increase in the first four menths of this year exhibits an increase of 26 per cent. over the corresponding period of 1905. This corporation is the largest manufacturer of cables in the world, and the business on its books in cables alone will call for the con-Sumption of 20,000,000 pounds of American engineering corporations of the German Empire are making new records in the consumption of American copper and are as busy as the busiest among the great electrical apparatus makers of America. Steady buying for round tonnages is going on for account of the domestic markets. Two manufacturers of wire bars are sold up to the ut-most capacity for this year, and the other refiners by the electrolytic process are behind on deliveries. In lake and electrolytic there is little metal for July, and four important producers of lake and electrolytic are sold out till September. There is no visible supply of either description. For nearby deliveries lake is fetching 19 and 19%c., and 17s. 6d.; forwards, £83 7s. 6d.; best selected £89 5s. Pig tin is firm at 38%@39c. spot. London asks, spot, £175 10s.; three months,

Pig lead is steady and firm at 5.90@6c. spot

Standard Gas Dividend Cut. Directors of the Standard Gas Light Company, a large majority of whose stock is wned by the Consolidated Gas Company, declared the regular semi-annual dividend

of 3 per cent. on the preferred stock yes-terday, but cut in two the dividend on the common. The rate on the common is 1½ per cent., as against a previous semi-annual distribution of 3 per cent. Both dividends are payable June 30. Verdict Against Lefter Sustained. The judgment for \$52,021, with interest from 1898, obtained against Joseph Leiter of wheat corner fame by William F. Zeller

was afirmed unanimously yesterday by the Appeliate Division of the Supreme Court. Zeller sued as the assignee of Allen, Grier, Zeller & Co., grain brokers in Chicago, on a promissory note, for the amount mentioned, given by Leiter to the firm in payment of part of his losses in his attempt to corner the wheet market in 1892.

To Increase Lincoln Trust Stock . The directors of the Lincoln Trust Company, 208 Fifth avenue, have decided to submit to stockholders a proposition to increase the capital stock from \$500,000 to 81,000,000. At the time of its last report the company had \$1,107,834 in surplus and profits and gross deposits of \$20,245,589. The stock has been quoted recently at 590 bid and 600 asked.

#### GOSSIP OF WALL STREET.

the important erain States where rain is needed resulted in a further advance in prices of wheat, cats and corn pesteriar and everted a depressing effect on the stock with the rest ago almost every one wall street reserved the condition of the growing crops as highly astisfactory and it tale of mind could continue to the end of the cases. This is the crop willing period and if mild be entirely without precedent if the fillers were to take a caestion this year first how much religione should be placed in their reports in quotier matter. It is still a long way to frost and earn checked at the start may yet easily make up for loss time. For much attention seems to be paid to limited sections where unfavorable coniting are known to exist and for little the regions which promise very heavy yields; but speculators in aron must live and after all their operations will not interfere with the harvest yield and may raise the average price to the farmer.

A report regarding the health of a prominent financies was believed to refer to the president of one of the larger banks who has been shroad for some months but who was exfact that he still remains away rumor ofsaid to be rather pour.

As an explanation of the weakness in umber of pool stocks it was said that some of the pools had a good deal of time money maturing this month and that they found considerable difficulty in obtaining renewals. The bankers, it was said, had shown a disposition to insist on a very large margin of oliateral and in other ways to throw such difficulties in the way of renewed borrowing that the pools had found it to their advantage o liqudate as far as this could be done in a ery narrow market.

When the manager of a pool calls up bankers and others on the public telephone and urges them to give him buying orders for the stock in which he is operating, and when especially those from whom he solicits business in this way are utter strangers to him he is more likely to create an unfavorable impression than to gain cooperation in a bull movement. No amount of argument on the lines that he had made money for their friends and would make money for them if they gave him a buying order for a few thousand shares could overcome the suspicion that he had stock for sale and was at his wits' ends as to how to dispose of it.

Pittsburg has not figured in the selling of Steel se far. On the break four years ago the stock kept pouring in from the iron city even when most people here could see no sign of any weakening in trade conditions, and the fact that there is no such selling at the present time is an indication that those who are in close touch with the industry see no reason for parting with Steel securities. well known speculator has in the last couple of days sold a good deal of stock which may have represented short selling, although more probably it was liquidation of a line accumulated in the expectation that demand for Steel in connection with the rebuilding of San Francisco would prove an argument strong enough to attract some thing like the old time amount of public in-terest.

Opinion was very much divided as to the source of the selling of Amalgammated Copper, but some close observers strongly expressed the belief that the heaviest supply of the stock appeared to come from 26 Broadway. Those who believed that this was so were inclined to argue that for some reason the Standard Oil group of capitalists was at present working for a decline in the market. Of course, there was nothing to support such a surmise, notwithstanding that attempts were made to justify a conclusion of the kind by the fact that the reports of earnings of the subsidiary companies of Amalgamated had not disclosed such dividend paying ability on the part of the parent company as it was generally supposed to possess. It was argued that the earning power was there disclosed and that partial concealment of results was apparently availed of to help along a bear campaign conducted principally through Amalgamated, but really intended to affect the general market.

Some attention was directed to Boston as a possible seller of Amalgamated in view of | The cash statement of the United States Treasurer the Lawson circular, and some brokers thought they could detect evidence of con-There was no real news to account for the apy tonnages were book ed in yesterday's parent change of attitude toward the stock for August and September ship- and perhaps the situation was best explained account of European electrical engineers.
One producer booked 12,000,000 pounds of wire bars for September. October and and that it had failed utterly to attract any considerable following. As for trade ditions reports were all good and the market for the metal in London showed a recovery of a substantial part of the preceding day's

The weakness in Reading seemed to have resulted from pool liquidation, but it may be well to mention again that the present pool is a very different affair from the one that carried the stock from 40 in 1904 to 164 in January of the present year. The rise to the last named figures marked the end of the operstions of the original bull party, and the present pool is an entirely different organization consisting for the most part of a few speculative operators, some of whom received notoriety from acting as brokers for the original bull interests. A good many traders have found it difficult to distinguish between those operators as brokers for a pool now no longer in existence and as the heads of a pool which originally derived strength from the erroneous impression that it included some of the most influential independent holders of Reading stock. Recently, however, it has not required any great powers of penetration to see that powerful interests were associated with the efforts to advance the stock, and that the trading represented for the most part manipulation designed to facilitate pool liquidation.

One of the rumors in regard to Reading was that a breach of faith had occurred among the members of the pool on individual members selling out privately and precipitating electrolytic is 18.75@18.85c. For September similar action by others who found out what shipments lake is 18%@19c.; electrolytic, was going on. This story probably resulted from a confusion of ideas and the mixing up 18½@18½c. Casting copper, thirty days, from a confusion of ideas and the mixing up is 18½@18½c. London quotes, spot, £84 of names of members of the old bull party, which has ceased operations with the present pool, which has always lacked its predecessor strength.

Earnings of Bultimore and Ohio as dis closed by the statement for the month of May were so large as to lend an air of probability to the talk of an increase in the dividend rate, the net for the eleven months so far reported exceeding by \$4,400,000 the corresponding item for the same time last year. dicates that the road will probably show for the whole year the equivalent of about 12 per cent. earned for the present outstanding amount of common stock. This in itself would afford a good basis for expectation of an increase in the dividend to 6 per cent were it not for the fact that the \$27,750,000 new common stock will at the present rate of dividend call for the payment of an addi-

tional annual sum of \$1,377,500 in dividends. This talk of an increased dividend on an increased volume of common stock in the case of Baltimore and Ohio naturally suggests the question whether the management it intended to increase the dividend would not have withheld the issue of the new stock until the increased dividend made it possible to get a better price than par for the new The last instalment of the price will not be paid until September, and the company could undoubtedly have obtained a orary accommodation to tide it over until directors acted on the dividend question, when in event of an increase it would probably be as easy to sell the new stock at 110 as it was to obtain subscriptions at 100. The company could thus obtain its money on more favorable terms than it has obtained it and the rights might prove of greater value to stockholders. Even delay could have been avoided by changing the term for

dividends from semi-annual to quarterly

and adopting the higher base of distribution, At once to be followed by the offering of the new stock for subscription. That something the this was not done is taken in some quar-Continuance of dry weather in some of ters as eridence that an increase in the divi-

> Revival of the rumor that the firest Northarn ore deal would be announced soon after the adjournment of Congress was received with a good deat of scopfician, especially in view of the evident affort to realize on a specifiative into of firest Sorthern etsek.

Disappointment was fall that the afternoon fally was an feable, and some conservative brokers said that about the only buying was what came from traders and a few other shorts, and that as the supply of stocks seemed to have increased rather than diminished it was impossible to escape the conclusion that there had been a good deal of liquidation by pouls and speculative cliques during the day. me of the largest commission houses said that business with them was still very small and that they were as much at a loss to find out where stocks went to as where they came from. The decline, they said, had not so far attracted any approximate measure of outside

#### IRON AND STEEL.

Improving Conditions in Iron Markets

-Searcity of Steel Milets and Mars. There is a slight improvement in the markets for foundry iron consumed by machinery manufacturers and pipe makers. In steel making iton very large tonnages have been sold through the week, chiefly for consumption in the Pittsburg and Chicago districts. Improving conditions as to the entering of new business are noted by the principal electrical and steam machinery manufacturers. In railroad supplies a good deal of new business is offering. A number of important iron melting plants East and West that had arranged to shut down for a few days in July, in order to make repairs, find that the pressing for products by customers will necessitate full operation of works, with not more than two or three days shutdown

for a tuning up of plants.

Most founders report business as being fully up to top notch records made at the height of last year's operations, and enough business on the books to run plants well to the end of the year. Prices of all grades of pig iron are firm and stocks are small, both at furnaces and in the yards of consumers. In the local market there are many specifications making the rounds, put out as feelers by the larger machinery and electrical apparatus makers. Makers and consumers of pig iron say that buying will be heavy during July.

Southern foundry No. 2 is ruling at \$14 at Birmingham; Eastern foundry No. 2 X is \$15 at furnaces. Bessemer and basic, valley fur-naces, are firm at \$17.25 to \$17.75. Several important contracts for coke have been placed in the local market. One for a lead, copper and silver smelting interest amounted to 150,000 tons, conditioned for delivery through twelve months. Southern furnace coke makers report sales of delivery through this year at \$1.95 to \$2.15. Foundry coke is quiet, except for prime Connellsville, which is in good demand at \$2.75 to \$3 for immediate or

remote shipments.

In the steel industries new business is comng in for heavy tonnages from the home market, and export inquiries are numerous. Tin plate merchants state that owing to the scarcity of steel tin bars fifty tin plate mills have been obliged to shut down in the face of an insistent market for tin plate both for the canning and the stamped tinware and tinsmith trades. Metal dealers in town from the meat canning districts of the West report that but for the falling off in the demands for meat products in tin cans there would be a tin plate famine in the canning trade. Var-nish makers and oil dealers are buying heavily in domestic tiff plates East and West, and Canadian trade is brisk for American tin plates. Throughout the staple lines of steel and heavy steel products prices are unchanged.

#### Live Stock Market.

Receipts of beeves were \$.412 head, including 63 cars for export alive, 128 for slaughterers and 13½ for the market, making, with previous arrivals, 16½ cars on sale. Steers were in light supply and steady for the under grades, and firm for choice fat bulls held up to full Wednesday's prices; common bulls were slow; medium and fat cows 5c, higher; bologna cows dull and not wanted. The yards were about cleared. Medium to choice steers sold at \$1.70@\$3.80 per 100 lbs., including distillery fed steers at \$1.90@\$3.70½; bulls at \$3.16g \$4.40; cows at \$1.75@\$4.15. Dressed beef in fair demand for good quality, and medium to choice native sides selling at 7½@\$3c. per lb. To-day's Liverpool and London cables quoted live cattle lower at 10½@\$1½c. per lb. dressed weight; refrigerator beef lower at 8½@\$1½c. per lb. Exports to-day, 2,900 quarters of beef; to-morrow, 1,200 beeves and 6,870 quarters of beef.

Receipts of calves were 194 head, all for the market; making, with the stale calves, 290 on sale. Veals ruled firm; buttermilks steady, and the pens were cleared early Common to choice veals sold at \$5.50@\$7.75 per 100 lbs.; good buttermilks at \$4.50. Dressed calves firm at 8½@\$1½c. per lb. for city dressed veals, and 8@10½c. for country dressed.

Receipts of sincep and lambs were 5,026 head, including 1 car for slaughterers and 19½; for the market; and 11 cars were to arrive later in the day.

for city dressed veals, and \$210\foressed. Receipts of sheep and lambs were 5,026 head, including 1 car for slaughterers and 19\foressed for the market; and 11 cars were to arrive later in the day. Therewas an active trade in both sheep and lambs at steady prices, and the pens were cleared of all the early arrivals. Common to prime sheep soil at 44@\$5.75 per 100 lbs.; good to prime lambs at \$8.65 @\$8: a few yearlings at \$66\\$7.50. Dressed mutton steady at 9@\$11\sqrt{2}c. per 15.; dressed lambs at 15@\$15c., with exira carcasses selling at 16c.; dressed yearlings at 11\sqrt{2}\sqrt{3}c.

Receipts of hogs were 2,000 head; all for slaughterers, with the exception of 15 head. Market easier. Good heavy and medium hogs were quotable at \$5.00@\$7 per 100 lbs. Choice light would probably sell at \$7.10.

THE BUNINESS OUTLOOK.

thun's" and "Bradateest'o" Print Anticfactory Reports

Dun's Review for the week mays that a moderate reduction in commercial activity is to be expected at this time of the year, but confidence in the futues is so strong that there is evident reflectance to assume seasonably quiet conditions.

This attitude is most pronounced in the industrial world, preparations for fall and

winter distribution being on an unpreceannounce that the customery summer shutto the netont necessitated by repairs heavy movement of merchandise is attested by an increase in calledy carnings thus far reported for June of 11 5 per cent, over the corresponding period of 1953. Foreign commerce at this port for the last week shows a gain of \$1,821,071 in exports and a dicrease of \$671,000 in imports, as compared with the movement a year ago. Listificias of commercial failures thus far reported for June amounted to \$2.512,549, of which \$1,507,043 in manufacturing, \$1,168,088 in trading

and \$72,400 in commercial lines.

Brodsfeet's says: Frade and industrial conditions are astisfactory considering the season of the year, the main point being that business in general is not only of average proportions but is, in many lines, quite in

excess of that of a year ago.

Fall orders for many lines of goods are coming forward in goodly volume, and jobbers appear optimistic as to the outlook. Machinery is well employed the country over. though summer shutdowns will be more in evidence from now on. The labor situation, while still disturbed at some points, has improved, if anything. Crop reports are some what better, the deterioration in the winter wheat belt having been fully discounted, while up in the Northwest the weather has improved, thes making for better growing crop conditions. At the moment the outlook is for a very good yield of wheat, though damage reports are numerous. In the cotton belt the situation is brighter, except at a few points, Georgia particularly, where severe rainfalls have damaged the plant.

Moreover, there is a slightly better ton to pig iron, the production of which is de-creasing and consumption is heavy, that fact preventing any large accumulation of stocks. Money continues easy, and collections range from fair to good. Building is active, hence immense demand for hardware and materials in general is well maintained, though yellow pine displays some weakness. Prices of commodities in general are, however, close to the record level. At San Francisco conditions are steadily improving.

#### NO LOCOMOTIVES NO DEFENCE. Testimony Against Illinois Central's Alle-

gation That It Couldn't Get Engines. R. J. Gross, vice-president of the American Locomotive Works, gave testimony vesterday morning in the law offices of Joline, Larkin & Rathbone, 54 Wall street, furnish locomotives from 1899 to 1905 at reasonable prices.

The testimony is to be used by the plaintiff in the trial of a suit brought by the Missouri and Illinois Coal Company against the Illinois Central Railroad in the eastern

Illinois Central Hallroad in the eastern district of Missouri.

Damages are being sought by the coal company because the railroad failed, it is alleged, to furnish the number of cars stipulated in a contract for the handling of the coal mined by the plaintiff between 1889 and 1905. The defendants allege in defence that they could not buy sufficient locomotives during the period named.

The witness declared that with reasonable

The witness declared that with reasonable notice, depending upon the contracts on hand, there was no time in the period men-tioned by the plaintiff that the company could not have furnished locomotives suitable for freight purposes, the pur-chaser and price being satisfactory.

#### COPPER QUIET, BUT STRONG. Foreign Demand Keeps Up-Consumption

Apace With Production. Walker's copper letter to the Boston Commercial will say to-day:

Copper is quiet, but continues very strong. Lake is held at 18%c. to 19c. per lb. for August and September delivery; electrolytic for nearby delivery is 183/c., for September, and October delivery 18%c, to 18%c.; casting is 18%c, to 18%c. There is a strong demand for prime grades of casting copper.

The domestic situation is quiet at the

moment and without special feature. Demand from European consumers continues strong. The recent activity of the foreign buying shows its effect in the copper exports for Europe, which are increasing steadily. Producers generally do not look for a very large increase this year over the output of 1905. Meanwhile the metal is going into consumption as rapidly as it can be produced, and there are many indications that this condition will continue for several months to come. The extensions now being added East when completed will help to ease conditions and will also facilitate a more rapid turning over of copper from producer to consumer. The refining plants are now crowded to their utmost capacity, yet they are not able to keep pace with the demands being made on them.

## BIG RIDE FOR A QUARTER.

Eric-B. & O. Rate War Cuts Round Trip Cleveland-Youngstown Fare to 25 Cents. Youngstown, Ohio, June 15 .- A rate war has opened between the Erie and the Baltimore and Ohio. It is said by the Erie that the Baltimore and Ohio broke an agreement not to run Sunday excursion trains to Cleve-land this summer by advertising an excur-sion for next Sunday at \$1.25 for the round trip. The Erie has announced a special excursion rate of 25 cents to Cleveland and Closing bid and asked quotations for active ronopah stocks on the Wall Street Mining and return next Sunday and has ordered out four trains to carry the people. The Lake Shore has reduced the fare to New York \$1

interest in the company.

The Eagle Fire Insurance Company announced yesterday that while it has decided to withdraw from California business, it intends to meet all legal obligations to its San Francisco policyholders.

The office of chairman of the board was created at a meeting of the directors of the Kansas City Southern Railway Company yesterday and Hermann Sielcken was elected to the place. Mr. Sielcken resigned as chairman of the executive committee and L. F. Loree, formerly president of the Baltimore and Ohio and the Rock Island companies, was elected a member of the board of directors and chairman of the executive committee.

Will Vote on \$25,000,000 Bond Issue CHICAGO, June 15 .- Stockholders of the Aurora, Flgin and Chicago Railroad will at a special meeting to-morrow vote on the authorization of \$25,000,000 of 5 per cent. forty year first mortgage and refunding bonds. It will be one of the important steps leading to the ultimate building up of

Erie to Buy Jermyn Mines. WILKESBARRE, Pa., June 15 .- It is reported that an agreement has been completed for the purchase by the Erie company of the three mines of the Jermyn Coal Com-pany. The mines employ 1,200 men and produce half a million tons a year. It is said the price is \$2,000,000. The mines have been idle for two months owing to a strike.

BONUS ON CITIZENS BANK STOCK. Hotders tiet 695 a Share Two Years After

When in 1964 the National Citizens Bunk and the Central National Bank were norganisto the Citizens Central National Bank, was agreed that the assets should be liquidated separately and that the surplus

injuritated separately and that the surplus of the new institution should be made up from the surplus assets of the two merged banks in the same proportion as their respective contributions of capital. To the stockholders of the bank showing the larger surplus was to be distributed an amount organ to the excess over the surplus of the other.

Yesterday the merger bank designed a dividend of \$25 a share to stockholders of the National Citizens Bank of record March 17, 1804, liquidation of genets of that bank showing a value of \$14 a share as against \$118 for the Central National. The amount involved in the payment of the dividend is \$257,500, but it in no way affects the surplus or individed profits of the merger bank, since the money has been regarded as simply on deposit there.

## B. A O. EARNINGS GAIN.

fires for May Show an Increase of Nearly e Stillton.

The statement of earnings and expenses of the Baltimore and Ohio Railroad Company, exclusive of the controlled and affiliated lines, for the month of May, as compared with the corresponding month of 1905, shows gross earnings, 1906, \$6,817,083;

CHICAGO, June 15 .- Careful tests have been made for seventeen months by the Harriman lines as to the relative cost of maintaining steel and wooden cars. The number of steel cars involved was 11,704, while of wooden cars there were 10,641. The average cost of repairs to steel cars was \$2.42 and to wooden cars \$3.74. The total difference was \$136,834 for a year.

Knickerbacker Ice Co. Dividend. Curcago, June 15.-The Knickerbocker Ice Company to-day declared the regular semi-annual dividend of 3 per cent. on the preferred stock.

#### Business Troubles.

Deputy Sheriff O'Rourke has received two executions, aggregating \$5,589, against the Ocean View Cemetery, which formerly had an office at 220 Broadway and a cemetery on before Samuel Thorne, a notary public, Staten Island. One execution for \$2,070 is regarding the ability of the company to in favor of the James D. Johnston Company and the other for \$3,519 in favor of the Chemical National Bank. A number of other judgments have been obtained against the concern in the last few months, the largest of which were two aggregating \$8,672 from Troy. of George B. Warren, who also obtained a judgment for \$5,368 against the St. Agnes Cemetery, which was absorbed last year by

Cemetery, which was absorbed last year by the Ocean View Cemetery, was organized in October, 1899, with Charles C. Dickinson as president, and was said to have bought several hundred acres of land on Staten Island. In August last there was a change of management and Mr. Dickinson was succeeded by James H. Caldwell of Troy as president.

Louis F. Benn, an electrician, of 725 Broadway, has filed a petition in bankruptcy individually and as partner in the firms of Benn & Benn, of which Charles Benn was the other partner, and the O. K. Electrical Construction Company, with Henry J. Johns, Jr., as the other partner, both of whom refused to join an the petition. The liabilities of the O. K. Electrical Construction Company are \$28,084 and the nominal assets \$20,796, of which there is cash \$10 and \$20,088 due from the city of New York on six public school contracts, against which there are creditors liens for \$24,511.
